EDUCATION

New Jersey Institute of Technology | Newark, NJ

September/2026 – May/2028

B.S. Computer Science

Mercer County Community College | West Windsor, NJ

September/2024 – May/2026

A.S. Computer Science, Certificate: Data Analytics

GPA: 3.87

- **Leadership:** VP of Computer Science and AI Club, VP of Scholarship for PTK Honors Society

EXPERIENCE

Sela Cloud: *Software Engineer Intern*

January/2026 – March/2026

- Built an AWS data pipeline using TypeScript, Lambda, S3, and Redshift Serverless to normalize billing data to FOCUS 1.2, stage Parquet files in S3, and load into Redshift, enabling faster cloud cost analytics.
- Migrated functionality from Jira and an in-house portal into Salesforce, collaborating in an Agile team to build Lightning Web Components and Apex services that cut dashboard load times by ~25% for customers.
- Designed and implemented an automated Salesforce case assignment workflow using Apex triggers and handler patterns to update status, enforce ownership rules, and notify external systems via webhooks.

Computer Science and AI Club: *Front-End Engineer & Vice President*

July/2025 – May/2026

- Led a hands-on workshop teaching 20 non-technical students how to leverage AI tools to build and deploy personal portfolio websites, with each participant leaving with a fully functional site to showcase their skills and experience.
- Engineered and maintained the CS Club's website using HTML, CSS, and JavaScript, collaborating with student engineers to design new features and improve overall functionality for 50+ student members.
- Integrated a Google Apps Script backend to process membership sign-ups directly from the site, automatically recording submissions in Google Sheets and reducing manual admin work for officers by 80%.
- Learned professional Git workflows and how to leverage AI for efficient development, utilizing feature branches, pull requests, and code reviews to ship production-ready features.

PROJECTS

Band Merch Store: *React, Spring Boot, PostgreSQL*

March/2026

- Built an ecommerce merchandise app for my heavy metal band using Spring Boot and React, enabling product browsing, cart management, and checkout through a REST API backed by Spring Data JPA.
- Implemented stateless JWT authentication with Spring Security, BCrypt password hashing, and role-based access control to secure admin-only product management across the backend and frontend.
- Designed a transactional checkout workflow that converted cart items into persistent orders with price-at-purchase snapshots, while reducing repeated frontend API logic by ~30% through a centralized fetch layer.

Data Science Job Analysis: *PostgreSQL*

May/2024

- Analyzed 2023 remote data analyst job postings in PostgreSQL to identify top-paying roles, in-demand skills, and salary trends, finding that the highest-paying jobs ranged from \$184,000 to \$650,000.
- Wrote SQL queries with joins, CTEs, aggregations, and filtering to find that SQL appeared in 8 of the top 10 highest-paying data analyst jobs and was the most in-demand skill with 7,291 postings.
- Evaluated salary and demand trends across analyst skills, showing that Python appeared in 4,330 postings, Tableau in 3,745, and Power BI in 2,609 to identify high-value skills for job seekers.

SKILLS

- **Programming Languages:** Java, Apex, TypeScript, JavaScript, MySQL, PostgreSQL, HTML, CSS, Python
- **Libraries & Frameworks:** Spring Boot, JUnit, React, Lightning Web Components, Bootstrap
- **Developer Tools:** AWS, Git, MongoDB, Docker, Salesforce DX, Postman, Figma, Jira, Tableau
- **Certifications:** Tableau Desktop Specialist
